Skin Tag and Milia Removal

Up to 15 mins - £48.50

Up to 30 mins - £79.50

Using a sterile disposable needle we can remove small unwanted skin tags and also miliumilia using a tiny electrical current. Both of these common skin conditions can occur at any time, and in the case of milia, may be caused by a build up of trapped oil underneath the skins surface often making them appear like a spot.

Thread Veins using Electrolysis

Thread veins can be removed using a low RV current with our electrolysis machine. A tiny needle is inserted into the small vessel cauterising it. Some light stinging and warmth can be felt during the treatment but it is successful at dealing with this problem.

Further information is available in our separate Client Guide on broken capillaries.
